## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 13 April 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Group I, claim(s) 29-45, 53-58, drawn to an electronic still camera including an image sensor, memory, and a printing device, which includes a printing head and a head driver, classified in class 348, subclass 207.2.
- II. Group II, claim(s) 46-51, drawn to an instant film printer comprising a film advancing device, a printing head and a head driver, classified in class 347, subclass 224.
- III. Group III, claim(s) 52, drawn to an instant film containing processing solution and a speed detection track classified in class 430, subclass 495.1.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility as an optical

Art Unit: 2612

printer, which does not include the features listed in groups III or I. Invention III has separate utility as an instant film, which does not include the features listed in groups II or I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

I. The applicant is informed that in the event that claims 29-45 and 53-58 are elected, the Applicant must further elect one of the following independent and distinct species:

Species I directed to an electronic camera, figures 1-7.

Species II directed to an electronic camera with mode selection, figures 8-19.

Species II directed on an electronic camera with a speed sensor, figures 20-28.

II. The applicant is informed that in the event that claims 46-51 are elected, the Applicant must further elect one of the following independent and distinct species:

Species I directed to an instant printer with a white light emission panel and LCD array, figure 29.

Species II directed to an instant printer with a white light emission panel and a color filter, figure 30.

Species III directed to an instant printer with a three color light emitting element array constituted of LEDs, or combinations of light emitting elements and LCD segments, figure 31.

3. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election:

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The following claim(s) are generic: none.
